---

## OBJECTIVE

Motivated and self-driven BSc IT graduate currently pursuing MCA, with a strong foundation in web development and programming. Skilled in building responsive applications and solving real-world problems using modern technologies. Eager to contribute to software development roles while continuously enhancing technical and analytical skills.

## TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, HTML, CSS, SQL
- **Frontend Development:** HTML5, CSS3, JavaScript, Bootstrap
- **Backend Development:** PHP, Node.js, REST API Concepts, MVC Pattern
- **Database Technologies:** MongoDB, MySQL, SQL Server
- **Tools & Design:** Git, GitHub, Figma - Version control, UI prototyping
- **OS / Networking:** Linux (Ubuntu), Networking Fundamentals
- **Other Skills:** Problem-solving, teamwork, adaptability

---

## PROJECTS

### Automated GIF Emailer

**Tech:** JavaScript, Node.js, HTML, CSS, GIF Processing Libraries, Email APIs

- Developed an automated system to generate animated GIFs from multiple images for email marketing campaigns
- Implemented image upload functionality and converted 3–7 images into a single GIF animation
- Designed a preview feature to allow users to review generated GIFs before sending
- Integrated bulk email functionality to send promotional emails with embedded GIFs to multiple recipients
- Enabled management of recipient email lists for efficient campaign distribution
- Built database support to store campaign records, email logs, and recipient details
- Improved engagement by replacing static content with dynamic GIF-based email communication
- Reduced manual effort by automating marketing workflows

## **Blood Donation Management System**

**Tech:** HTML, CSS, JavaScript, PHP, MySQL

- Developed a web-based system to streamline blood donation processes
- Designed user-friendly interfaces for donors and recipients
- Implemented database integration for managing donor and request data
- Improved accessibility of blood availability information across different locations

## **E-Learning Website**

**Tech:** React.js, Node.js

- Built an interactive platform for students to access online courses
- Implemented progress tracking and structured learning modules
- Designed responsive and user-friendly interfaces
- Focused on scalability and performance optimization

---

## **CERTIFICATIONS**

- **NPTEL Certification – Data Analytics with Python** – Gained practical knowledge of data analysis, Python libraries, data visualization, and analytical techniques.
- **NPTEL Certification – Cloud Computing** – Learned cloud computing concepts including virtualization, cloud services, deployment models, and distributed systems.

---

## **ACHIEVEMENTS**

### **Active Member – IT Club**

- Participated in technical and club events.
- Contributed to event planning and coordination.

### **Event Coordination**

- Managed seminars and speaker sessions.
- Assisted in organizing tech fests and activities.

### **Team Collaboration**

- Worked effectively with team members.
- Helped ensure smooth event execution.

---

## **Workshops and Seminar**

### **Innovative Designing of an Application with Spring Boot Workshop**

- Learned Spring Boot application development concepts, backend design techniques, and real-world implementation practices from industry experts.

### **Turning AI Models into Real-World Applications Seminar**

- Explored practical implementation of AI models, real-world AI solutions, and industry applications of artificial intelligence.

### **Artificial Intelligence & Machine Learning Seminar**

- Explored AI/ML fundamentals, predictive analytics, neural networks, and industry applications.
